

## Radimpex Tower 7

x version requires the "User Account Control" be enabled. Mac OS X v10.8.1 or later is required to run this program. You will need to download and install the HaspCom API's. Follow the instructions below. For Windows users, copy "HaspComAPI.dll" to "C:\HaspComAPI\HaspComAPI.dll" and restart the computer. For MAC users, copy "HaspComAPI.dylib" to "/Library/Frameworks/HaspComAPI.framework/Versions/A/Resources/HaspComAPI.dylib". Go to the HASP download section and choose "Haspsv200.zip". Open the.zip file. Double-click "HaspComAPI.dll" to start the "HaspComAPI" program. Go to "Tools->Options in Word". Click "Trust Center" Click "Internet Options" Click "Certificates" and click "Add More" Select "Trusted Root Certification Authorities" Click "OK" Click "Close" Click "OK" in "Internet Options" Select "HaspComAPI" from "Programs". Click "Start HaspComAPI". Click "Set" in "Configure". Make sure to choose the "Yes" radio button. Click "OK" and "OK" in Word. After the HASP process is "Running", you can close the window. If it does not "Started", go back to the "HaspComAPI" window, and double click on "InstallHaspComAPI" to finish the installation process. Once you have "InstalledHasp
