5, one of the biggest is the updated DualShock wireless controller. The new controller has several new features and  
improvements that Sony is now listing. You can take a look at them below. According to Sony, the new DualShock wireless  
controller features a battery life of up to 15 hours, a higher performance and more subtle rumble than previous controllers, and  
more intuitive button mapping. There's also a new "DualShock 4 Light Pad" (h/t Computer Games), which is a replacement for  
the stock touch pad in the new controller. The light pad will allow players to map buttons to the controller via an app and can  
also help gamers in low-light environments. You can find the new DualShock wireless controller now in the U.S. and Japan. It  
will go on sale in other countries in the future. SOURCE: PlayStation#!/usr/bin/env bash echo "Content-type: text 2d92ce491b
