Xsystem35 Android Arm 173pre5test8.zip T., and Gonzalez, A. E. 2010., 716, L11 Zhang, F., Liu, W.-J., & Zhang, S. N. 2012., 753, 56 Zhang, X., Zheng, X., Brandt, W. N., et al. 2008., 687, 845-861 Zhang, X., Zhang, S. N., Brandt, W. N., et al. 2009., 695, 733-746 [^1]: Our units for the velocities in the rest frame of the BLR gas are adopted. If a dimensionless quantity is converted into units of velocity, the units should be normalized by multiplying the quantity by the speed of light. In this case, the units of velocity are 10^{-7} and 10^7 km s^{-1} at frequencies of 10^{14} and 10^{15} Hz, respectively. [^2]: The adopted density profile is similar to the ones used in `\sec:mkn_reseed`. We set $\text{SN}_{\text{H}}=6 \times 10^{20}$
