Jan 25, 2563 BE Dr. Who Full Episodes Download HD 1080p TV Shows..Abnormal cerebrovascular reactivity in patients with sleep apnoea syndrome. To test the hypothesis that obstructive sleep apnoea syndrome (OSAS) is associated with a disturbance in cerebral vasomotor reactivity (CVR) and cerebral autoregulation (CA). Twenty-three patients with OSAS and 21 age and sex-matched normal controls were evaluated using transcranial Doppler sonography (TCD), autoregressive model analysis and the stepwise-regression method of Lindinger to measure CVR and CA. Both CVR and CA were abnormal in the majority of OSAS patients, and, both CVR and CA were correlated to the apnoea index and time of sleep with an arousal. OSAS is associated with a disturbance in CVR and CA. These abnormalities may play a role in the pathogenesis of the vascular complications of OSAS.
