A: You can execute
this commands to get
the account name, to
get this the user you
need to be in the
"sysadmin" role:

sp_helppwd
sp_helpsrvrolemember I
tested with the
following roles:
sysadmin service_admin
service_console_admin
db_owner
db_securityadmin I get
the results for all
three commands:
sysadmin service_admin
service_console_admin
It looks like the
following roles
already have this

information in their
system view: sysadmin
service_admin
service_console_admin
db_owner
db_securityadmin Now

Tips That Could Make
You a Better Networker
Remember that special
time when you realized
that you could tell so

much about a person by their Twitter bio? Or that you could even use Twitter for job hunting? That you didn't even know how to navigate the interface? Well, the good news is, there's a multitude of resources out there to help you learn all of the ins and outs of Twitter. For instance, these Twitter

networking tips: 8.

Keep Your Profile Visible Whether you're a member of a professional organization, are looking for a job, or just want to expand your network, make sure that your profile is visible to the world so that people can connect with you, and you can connect with them. When you

first join Twitter, you are prompted to enter your profile information. This includes your profile photo, a description of your background and/or job experience, your followers, your list of people you follow, and the links that you want people to click if they follow you. While it may seem that there is

a lot to consider,
it's not hard to make
a thorough profile.

Here are some
important components
to include on your
Twitter profile: Your
bio Your interests,
links, and favorite
things Your work
history Your favorite
books, movies, and TV
shows A link to your
company website Your
Twitter profile

Building Your List of
Followers One of the
most important things
to keep in mind when
you're networking on
Twitter is that you
don't want to spam
people. Instead, you
want to let people
know that they can
