## Dublato In Romana 13

A: I have found the solution: in order to get the right properties and values of the object we have to run the following command:

```
C:\Users\dev>(default-directory) \Jdk10\bin\java -Dcom.sun.management.jmxremote \ -Dcom.sun.management.jmxremote.port=1690 \
-Dcom.sun.management.jmxremote.authenticate=false \ -Dcom.sun.management.jmxremote.ssl=false \
-Dcom.sun.management.jmxremote.local.only=false \ -Dcom.sun.management.jmxremote.password.file=C:\Users\dev\.jmx.password \
-Djava.rmi.server.hostname=192.168.1.101 \ -classpath "C:\Program
Files\Java\jdk1.8.0_151\jre\lib\rt.jar;C:\Users\dev\.jmx.password;C:\Program Files\Java\jdk1.8.0_151\lib\log4j-api-2.5.jar;C:\Program
Files\Java\jdk1.8.0_151\lib\log4j-core-2.5.jar;C:\Program Files\Java\jdk1.8.0_151\lib\log4j-jcl-2.5.jar;C:\Program
Files\Java\jdk1.8.0_151\lib\jline-0.9.94.jar;C:\Users\dev\.jmx.password;C:\Program Files\Java\jdk1.8.0_151\jre\lib\ext\access-
bridge-64.jar;C:\Users\dev\.jmx.password;C:\Program Files\Java\jdk1.8.0_151\lib\javax.management-1.4.0.jar;C:\Program
Files\Java\jdk1.8.0_151\lib\tools.jar;C:\Users\dev\.jmx.password;C:\Program Files\Java\jdk1.8.0_151\lib\management-
agent.jar;C:\Users\dev\.jmx.password;C:\
```

>>>bit.ly/2uLn0tP. E1977f8242 [,alvin,,dublat.2010] 1 13 - Download,,Barbie,,in,. A: The reason is that  
your init function is not returning a promise from Promise.all but from just a regular function. So  
Promise.all doesn't know what to return (any other promises) when you return a plain function. function  
init(){ return Promise.all([ // 1 getRandomImage('images/pic1.jpg'), getRandomImage('images/pic2.jpg'),  
getRandomImage('images/pic3.jpg'), // 2 getRandomImage('images/pic4.jpg'),  
getRandomImage('images/pic5.jpg'), getRandomImage('images/pic6.jpg'), ]); } To solve this you could  
either: Promise.all() the returned function from init() wrap init() and Promise.all() in a function called  
initAsync just return the promise in init() Then Promise.all would just need to know what to return. If your  
code needs to work offline, you could use request for example. Q: Symfony: How to get a list of what  
parameters to a function? Let's say I have a service in Symfony 2d92ce491b
