It's crashing on the line: response = NSURLConnection.sendSynchronousRequest(req, returningResponse: &returnedResponse) Specifically, it points to this line of the method: let jsonData = NSData(contentsOfURL: req.request!.URL!) I even tested it by downloading the file locally and opening it in my text editor. No matter what I do, it crashes, and I don't see any error log on the console. Any ideas? func getCurrentWeather(){ var req: NSMutableURLRequest = NSMutableURLRequest() let urlPath = "" req.URL = NSURL(string: urlPath) req.HTTPMethod = "GET" req.HTTPShouldHandleCookies = false req.HTTPBody = nil let returnedResponse : NSDictionary! = nil let result : NSError? = NSURLSession.sharedSession().dataTaskWithRequest(req, completionHandler: { data, response, error in let errorCode = response?.statusCode let jsonData = NSData(contentsOfURL: req.request!.URL!)
