The temperature of the cytosol of blue mussel (*Mytilus edulis* L.) has been measured with a thermistor that was attached to the myosin head, the ATP-binding region of the actomyosin motor. Measurements were made over a range of temperatures from 0 degrees C to 37 degrees C. The relationship between the temperature of the water and the temperature of the cytosol is described by a polynomial function of 4th degree and a temperature coefficient of 3.06 degree C⁻¹. Tied to the thermistor, the head ATPase of purified mussel muscle myosin II was used to perform biophysical and biochemical experiments. These experiments demonstrated that the temperature coefficient of the myosin head, the 3ef4e8ef8d
