IconPackager was designed to enable you to create your own icons, you can even change the icons for folders or applications .
Mar 3, 2018 The latest update has fixed the issue where there werent any icons at all, so it was just a blank desktop. Unfortunately, I dont want to have to wait for the next update to fix it again, so I figured Id post a screenshot. Mar 16, 2018 The icon pack that I have installed from Stardock IconPackager is not registering as set, and there is no icon pack to select. Apr 20, 2018 IconPackager also allows you to create icons for folders, and a few of the Stardock applications like Halo: CE
IconPackager was a paid application, I am glad to see that it's free. I have no ill will towards Stardock, I'm hoping that they are going to release an update to fix the issue. May 2, 2018 It worked for me. I uninstalled the app and reinstalled it and it worked.
May 6, 2018 The IconPackager desktop icon setup is not working for me. As I try to change the icon pack, the program says "The selected image is not available for this location" I am reinstalling IconPackager to see if this has been fixed. However, the Stardock IconPackager is working just fine. I also recommend using this method to create your own icons for applications and folders.
