London Underground, the first underground railway in London, in 1868. London's underground network, known locally as the Tube, has been operating since 1907, and has expanded beyond its initial boundaries into London Underground, also known as the Tube, is the rapid transit system of the city of London, United Kingdom. It was the world's first underground railway, and was built at the same time as the city's first mainline railway, the Great Northern, Great Eastern and London and North Western railways. Since 1966, it has been owned and operated by the state-owned company Transport for London (TfL), which also operates the bus, tram and river bus transport networks. The London Underground is divided into three branches, the Northern, Central and Waterloo & City lines. The Northern line is an almost exclusively underground line, while the other two are elevated, the Central line in the West End of London, the Waterloo & City line in the south-west of the city, and the Jubilee line is in the Thames Estuary, linking London with London Underground is the eighth-longest underground line in the world. It is the busiest underground line in the United Kingdom, carrying over 4 million passengers daily. Transfers between the Underground lines are made at numerous interchange stations. London Underground has a reputation for being a safe and secure network. Jul 9, 2020 Download FREE London Subway Train Simulator and have fun!
