Ricks is a criminal resurrected after being executed to go to a futuristic prison to be infected by a virus created by a large prison gang. Recently I saw this film, shot in 2011. A film about a zombie apocalypse, about a prison, about how people can find themselves over the years. There is even a love line in this film, which simply cannot be missing in a film like this. The plot is simple, but not that simple. At some point, when zombies appear in the frame, you understand that there is some kind of zest that simply does not let you move away from the screen, but makes you watch the movie more and more. fffad4f19a
