Aug 29, 2018 The missing or outdated graphics card driver can also cause the Age of Empires 3 Initialization Failed issue in your computer, so you should . i have tried both the game and the installer in "All Programs" but it does not show in the list.aoe 3 datap.bar error i'm getting on my pc

Aug 29, 2018 The missing or outdated graphics card driver can also cause the Age of Empires 3 Initialization Failed issue in your computer, so you should . Rockerne123 General Discussion

Mar 22, 2020 This is a known issue which is resolved. Download the latest version of the game directly from [www.microsoft.com] and then, install the game without any error. . Open up the Windows Registry and follow these steps – 1. Expand the window as shown below and click on the “HKEY_CURRENT_USER\Software\Microsoft\Windows NT\CurrentVersion\AppCompatFlags\Layers”. 2. Now double-click on the [DataPathBAR] key and a new window will pop up as shown in the image below. 3. Right-click on the key and click on Delete key in the context menu. 4. After the deletion, run the Age of Empires III installer and the installation will start with no errors in your computer. .

Apr 25, 2020 There are two possible causes of the age of empires 3 datap.bar error in your computer. The first one being that the installation/registration of the game is not done correctly. The second one is that the graphics card driver is missing or outdated . We are well aware of the issue and are currently working on a solution for the same. Please rest assured that it will be resolved soon. We are in constant communication with our development team to fix this. If the error still persists, go through this thread to know the possible causes . You can follow the steps and the solutions mentioned in the thread to fix the error in your PC.

Apr 21, 2020 Age of Empires III: The Forgotten Kingdoms is a Free-to-Play online multiplayer strategy game that was developed by the independent studio Gas Powered Games. It is available to play on both PC and Mac platforms. It is a sequel to the Age of Empires II series.

Jul 15, 2018 Age of Empires III: The Forgotten Kingdoms Initialization Failed error may be triggered

A: Try running the executable (on windows you can do it via explorer): "winrar" -e "*.exe" This should open a file manager window and you can browse into the directory. A: Downloads can be very big. I have seen cases where a game has been around for years and the installer is just the bare bones. They then have an update if they want to make the game better and when this happens they usually just re-release the game. But as people have already tried to install it in the past it has a 'patch' file. So what you do is get the patch file and that gets installed (unzipping on a windows computer could be a pain) and if it installs then you just copy your latest game file. Once you have done that then you can just go back to your game and test it. Hope this helps
