Tuesday, September 8, 2011 Preparation Hello! I've been a little off the computer lately but here is a quick update on what I've been doing! We've got a garden going on here in WI. It is a small garden, just 1x6 ft, with some mulch, compost, and a few plants. We have beets, greens, peppers, radishes, cucumbers, strawberries, and herbs. I picked some herbs to make pesto. It turns out that putting greens in the ground is a great idea. Our problem is that we get snow. Usually, we have snow until April. Last spring, we were too excited that we didn't realize the lettuce and broccoli would be buried under snow. This year, the snow has been gone for the last few days and we've had lots of rain. I want to have food for my family. Not just eat it, but enjoy it. I made some pesto using the herbs I had and also with roasted tomatoes. I found this recipe and it sounds really good. I used basil and oregano instead of parsley. I also froze some tomato soup in a muffin tin so that I have a ready-to-go lunch. Making pesto was so easy. I put everything in a food processor. All you need is basil, garlic, olive oil, and cheese. You can add some other herbs like thyme, rosemary, and cumin. It was a great accompaniment to the beets and other greens I had. I also made a strawberry rhubarb crisp from Pinterest. I used blueberries, strawberries, and rhubarb. The bread was good and the berries were so yummy. I hope that I will be able to keep up my productivity as school gets started in October!Q: Why did the Company provide its own employees with Star Trek uniforms
