It allows you to download YouTube videos and save them to your disk or stream them online using the latest Windows media player. YoutubeGet provides a simple and free way to view, download and convert YouTube videos. Convert YouTube videos to MP3, MP4, AVI, MP4, WMV and 3GP. Share them with your friends on Facebook or watch them online. This powerful online Youtube converter works fast and does not require any registration. YoutubeGet Description: YoutubeGet.net website is well-organized and easy to use. It does not require Java, Adobe Flash or any third party plugins. It allows you to perform a number of tasks with ease and also saves the output files in a separate folder. The interface is based on a regular window and a separate drag zone for quickly performing a task. The main application frame is well-organized. You can create a new task by pasting the YouTube URL and specifying the output format and directory. Advanced users may fiddle with audio and video settings when it comes to the bit rate, frame rate, frequency, sreen size and channel mode. You can also ask YoutubeGet to automatically save files in high quality mode when HD video is not available. This set of options applies to the video converter as well. As far as program options are concerned, you can specify a post-task action (open the folder, do nothing) as well as set the tool to hide or automatically open the drag zone. YoutubeGet uses low system resources when performing a task, has a good reaction speed and delivers quality videos. We have not come across any issues throughout our evaluation, since the tool did not hang, crash or pop up error dialogs. Thanks to its intuitive layout and advanced settings, YoutubeGet should please all users. On the other hand, there are other utilities that can perform YouTube download and conversion job for free, such as aTube Catcher. YoutubeGet is an ideal tool for viewing, downloading, converting and uploading YouTube videos in high quality mode.After 3 days of reading and collecting lots of great ideas from the Virtual Workshop on Security Writing, the end of the 3 days was full of ideas and energy. We did not have much time, but the team found time for 2 dinners, 2 drinks and some rumba in a beautiful loft. Congratulations to all the team for their courage and their dedication. As there were many tips, many ideas and many reflections, here is my final summary of what we learned for my own use as a security writer. It's a list of things we learned about security writing in the three days: We learn that we should have an overview of the topic in mind, with an eye on the general topics that are dealt with in the field, and that we should be able
