I have a table with a name "users" and it has 14 columns. I create a new table with the same name "users". I insert my data but when I want to update my table, I can't use the UPDATE statement. I have just 14 new columns and I want to update 15th column. I tried also the ALTER TABLE statement but nothing is working. Please help me with this problem. A: You don't need to use ALTER TABLE, you can use INSERT... SELECT statement. For example, INSERT INTO users (user_id,user_name,user_surname,user_mail) SELECT user_id,user_name,user_surname,user_mail FROM another_table WHERE user_id = 1234 It inserts your records and fill new column if it does not exist. If you want to UPDATE your existing records with one of the new columns you can use, update users set user_mail = NEW_USER_MAIL where user_id = 1234 If you want to see your UPDATE statement you can use SELECT.... Q: What does this flag mean? According to some flags I received, they all mean the same thing, but I'm not completely sure. It seems the messages are
