The proposal to tax online shopping as local sales taxes is aimed at replenishing state coffers by raising \$20 billion in additional revenue a year. The Green Party, one of the few parties in parliament that has a left-wing profile, has long pushed the tax on a wider variety of goods. Ms. Merkel's Christian Democrats (CDU) said the tax could hit up to 15 percent of German revenues from online shopping, while her center-right Social Democrats said the tax could be as low as 7.5 percent, which Ms. Merkel has supported. Even as lawmakers in the Bundestag, the lower house of Parliament, were debating the issue Wednesday, Ms. Merkel and other senior officials from her party said they did not want Germany to impose a tax on online shopping as part of the planned digital package that ministers will begin discussing in October.Molecular characterization of bovine parainfluenza virus type 1 isolated from beef cattle. Parainfluenza virus type 1 (PI-1) strains were isolated from respiratory tract secretions of beef cattle in a feedlot operation. The culture-derived virus was passaged in young domestic calves for six generations, and was found to produce a more severe, self-limiting disease in the animals than a bovine PI-1 (cPI-1) virus previously described. Viral RNA extracted from the bovine PI-1 strain and cPI-1 virus was used as template
