What is new in this release: – Improved user experience and performance – The tool now uses Windows 8.1 style interface – Fixed a number of minor bugsRationale for an integrated approach to the treatment of overweight and obese children. Paediatric obesity is a global epidemic, and the risk of chronic diseases such as cardiovascular disease, type 2 diabetes mellitus and some cancers increases with the degree of obesity. Additionally, there is a significant psychosocial burden of obesity, and treatment can lead to significant health benefits. Although many pediatric obesity guidelines focus on behavioral change to increase physical activity and decrease sedentary time, there is an increasing interest in targeting body composition for the prevention and treatment of obesity. The aim of this review is to provide the rationale for an integrated approach to the treatment of overweight and obese children. The Kompose Keyboard is designed to let users quickly navigate between screen areas using gestures. Kompose can be used as a floating panel to allow quick access to common features of any application. A little bit about Kompose: Kompose has been designed with accessibility in mind. By default, the keyboard is treated as a floating panel that you can drag and drop anywhere on the desktop and which you can dismiss by pressing the ESC key. Just drag and drop it anywhere on the desktop or select "Dock to desktop" in the Preferences to make it a panel instead. You can also lock the panel by holding down the ALT key and use the window buttons to bring it up and down. It is possible to set the panel to display only on one monitor, either by selecting the monitor from the panel options or by using the keyboard shortcut "Alt+Tab". It is also possible to lock the panel on one monitor. You do this by setting the panel to display only on one monitor, either by selecting the monitor from the panel options or by using the keyboard shortcut "Alt+Tab". This is useful if you want to attach the panel to a particular window, such as the browser, a browser tab or a document window. In case you want to dock it to a specific application, drag it directly into the application and it will automatically dock itself. It is also possible to pin the panel to a specific location on the desktop by dragging it there. You can then click "Pin to Desktop" in the panel options or use the keyboard shortcut "Win+D". You can also set Kompose to show the panel on the current screen only, by selecting the screen in the panel options or by using the keyboard shortcut "Win+Tab". In case you want to dock the panel to a specific application, drag it directly into the application and it will automatically dock itself. It is also possible to pin the panel to a specific location on the desktop by dragging it there. You can then click "Pin to Desktop" in the panel options or use the keyboard shortcut "Win+D".
