What's New in the CodeTwo Office 365 Migration?

If you have a problem migrating from or to Google Apps and the following error appears: ""Unable to connect to the mail server"", you may find some solutions in this article. Make sure to read through the instructions thoroughly and follow every step of the way to ensure the success of the process. If you are receiving an error when attempting to import into your Office 365 mailbox stating: "The Identity of the target server is not supported, a timeout has occurred, or the account is no longer active" and you are using the migration tools provided by Office 365, try the following steps to resolve the issue: Check to ensure that the identities of the target account and email address are correct. Ensure the server settings in the target Office 365 account are correct. Do you see this error message in the event viewer of Office 365 after the migration process has completed? You can fix the issue by following these simple steps: Click the ellipsis (...) button, select 'manage advanced settings', and click 'Change'. On the 'Configure advanced settings' page, deselect the 'Device offline settings' and 'Notifications settings' checkboxes. After that, save your changes and try again. We hope that this quick help will be a good starting point for you to resolve the issue. To make it easier to integrate Google Apps with Office 365, Microsoft has introduced the new version of Office 365 Migration tool for Microsoft Office 365 called CodeTwo Apps Migration. It allows users to migrate their data from one set of Office 365 services to another. In this article we are going to discuss about How to migrate data from Google Apps to Office 365. The process of migration usually requires a user to import the data from a Gmail account to a local computer. This process can be time-consuming and difficult. Not only that you have to be careful about the content of your data and the settings of your Google account. The migrated data can be lost if you choose not to follow the instructions properly. With the CodeTwo App Migration you can avoid all these problems and maintain the original content of your data in your Office 365 account. The steps are quite simple and easy to follow. Sign in to your Google Apps account and install the software. Then click the big yellow icon (...) that appears on the top right corner of your Google Apps mailbox. Select 'export' and select 'export as zip' file. Copy this file to your local computer. The whole process will take you a couple of minutes. On your local computer, rename this file to gapps.zip and upload the file to your Google Apps account. On your local computer, choose the file you uploaded and click on the 'Upload' button. After the transfer is completed, you will find the file on the 'Downloads
