Cryptor

Cryptor is a security application that features advanced, yet intuitive options for password-protecting files and folders to prevent other users from accessing your personal documents, photos, and anything else of importance. Straightforward setup and interface The installation procedure is a speedy task that doesn't give you any trouble, since there are no special options, third-party components, or mandatory software products involved. Administrative privileges may be required to avoid errors. Cryptor is wrapped in a user-friendly interface made from a standard window with a plain and simple structure, where you can populate the task list with as many files and folders as you want to encrypt at the same time. Encrypt and decrypt files with passwords It's only necessary to specify the password to create new and secured files that can be only decrypted with the help of this tool. Just make sure you don't forget the key. The program can be asked to remember it for encrypting new items. As far as security settings are concerned, you can select the encryption and decryption algorithm between Blowfish, RC2, RC4, DES, AES 128-bit, AES 192-bit and AES 256-bit, pick the working thread priority, as well as allow the utility to delete the source files after carrying out encryption and decryption tasks. Evaluation and conclusion Tasks were carried out swiftly in our tests, during which the software app remained light on system resources consumption, thanks to the fact that it needed a low amount of CPU and RAM to function normally. We haven't come across any stability issues, since it didn't freeze, crash or display error messages. Cryptor Description: Cryptor is a security application that features advanced, yet intuitive options for password-protecting files and folders to prevent other users from accessing your personal documents, photos, and anything else of importance. Straightforward setup and interface The installation procedure is a speedy task that doesn't give you any trouble, since there are no special options, third-party components, or mandatory software products involved. Administrative privileges may be required to avoid errors. Cryptor is wrapped in a user-friendly interface made from a standard window with a plain and simple structure, where you can populate the task list with as many files and folders as you want to encrypt at the same time. Encrypt and decrypt files with passwords It's only necessary to specify the password to create new and

What's New in the?

Patcher is a free utility program for Windows that aims to be used for a variety of tasks, including patch, repair, patching files, folder, and system.
