## What's New in the?

MediaTab is a simple application that can be used to analyze multimedia files and provide you with additional details about their contents. Key features: \* Multimedia file analysis: enumerates all multimedia files on your hard disk and displays information about their format, duration, file size, bitrate and other parameters; \* Automatic codec detection: ensures that the selected file is a multimedia file and automatically detect the most appropriate codec for it; \* Quick information about the selected file: displays various information about the selected file, including its path, bitrate and duration. System requirements: \* Microsoft Windows 2000, XP, Vista or 7; \* Microsoft Internet Explorer; \* Internet connection; \* PC with enough memory (Windows XP requires 512 MB RAM); \* Java 1.6 or higher; \* MediaTab is not compatible with the following operating systems: \* Mac OS X, \* Linux and other Unix-like OS. Description: PhoneCallRecorder can be used to record a phone call, rather than just listen to it. It is a very effective and easy to use tool which you can use to record your phone conversations to save them for future reference and analysis. PhoneCallRecorder allows you to record incoming or outgoing calls. Record on-hold calls as well as Skype calls. Key features: \* Recorded call can be saved to your hard drive; \* Recorded call can be played back in reverse, forward, repeat, fast forward and fast reverse; \* Capturing of incoming and outgoing calls, conference calls, instant messages, calls from Skype, VoIP, SIP and other VoIP protocols; \* Conferencing can be recorded using two or more phones; \* Capturing of phone-call conversations, message exchange, voip calls; \* Multiple files can be saved to the same directory, with different names, one per file; \* Available as a portable application (Windows Installer, MSI installer). Description: EudoraCalendar is a solution for organizing your mail. It provides a calendar-like interface for managing your mailbox and e-mail client related tasks. Every day, the program creates a summary of the latest messages received in your mail client and displays it in the form of a calendar. This program is not just useful for those who use Eudora mail clients but also for those that use MS Outlook or other e-mail clients. There is a "preview" function that allows you to see a quick overview of your upcoming events. This is a nice and efficient way to see what is happening during the day. EudoraCalendar works with Eudora 1.1 through Eudora 5.2. You can also import and export your data using the program's file transfer protocol (FTP) file

---

system. This allows you to synchronize your data between computers. EudoraCal
