If your digsi 4.86 could not contact through soc port, you can try Digsi 4.86 Wireless. Digsi 4.86 Wireless can contact through WAN port and WMI port. Digsi 4.86 Wireless Cable: a_3_5.com digsi 4.86 router serial Read More About Digsi 4.86 siemens digsi 4.86 cd's digsi 4.86 remote access A: Possible reasons The "software" installed on the PLC does not match the Digsi 4.86 software on the floppy The "software" installed on the PLC does not match the Digsi 4.86 software on the CD There is a corruption on the CD. When this happens, it is always useful to check the "health" of the CD. I would recommend you to download the newest SIPROTEC software release. Your DIGSI 4.86 CD was made on April 29, 2012 so I would guess it is no more the latest version. You can check this with this query in the "Overview" tab of the DIGSI Viewer: SELECT * FROM V_DIGSI WHERE VER = '4.86' What do you get? Solution What you should do next is to replace the CD. But there is another solution. If the PLC does not recognize the CD, you might be able to get the PLC to install the software from the CD. To do that, follow these steps: Open a new browser tab. Enter the IP address of the PLC and go to the DIGSI Admin. Click "Device -> New Device...". Give the device a name and then choose "CD Device" Select the CD you want the PLC to use. Click "Device -> Installation -> Install Software from CD" Wait for the software to install. Click "Device -> End Device" to end the new device. Click "Device -> Device Status" to check if the new software is installed. If the software is not installed, click the "Device Status" tab to check the errors. Open a new browser tab and enter the IP address of the new PLC device. Click "Device -> New Device...". Give the new device a name and then choose "PLC Device" Select "PLC Install 4bc0debe42"
