If you've been using the program 'Photoshop' the chances are that you've experienced many situations that arise during editing your photos or while printing them. You may want to resize your photo and then print it, but you need to do it with the program on hand, otherwise Photoshop won't be able to do what you want. The problem with resizing this kind of files is that it can actually lead to loss of quality. Besides, it could be very hard to select the right size. In this case you'll need a utility that will take your image files and resize them accordingly. If you want to choose the photos you like and also save some bandwidth, taking your own choices will most likely be the best way to go. Here is where The jpeg Resizer comes in. The application allows you to select or drag files into it and then the program will automatically resample, resize and optimize your photos. The software is pretty fast and, more importantly, it won't cost anything extra if you do it on your own. Here you have a few other tools for photo editing and post-processing, along with the standard tools. One of the major advantages of The jpeg Resizer is that it does not modify the content of the picture and even preserves the copyright. The main program window is easy to use and includes all the operations you'll need to perform in one place. The settings window allows you to change a lot of different things, like color, window view, compression and file format. By clicking on the 'Add folder' button you'll be able to select folders and choose all the files you want to work with. The major advantage of this is that you won't have to resample files that have been split, which is the case with some software. The program is freeware, but we do highly recommend downloading the full trial version, which gives you a complete overview of the functionality of the application. As you can see The jpeg Resizer does offer a lot of features and it does its job well. It's a very simple tool which doesn't require any complicated settings or time-consuming programs to work.
