Comments Is there anyway to determine why i'm getting runtime errors..?? I'm getting errors that are rather cryptic in nature.. For example..Run-time error '-2147483645 (80010108)': Application-defined or object-defined error please help.. I'd really like to know what i'm doing wrong Can you please advise how to add a sheet to the file that I already have? I have 5 separate files and would like to merge the data from all of them into one document. I want to create a new sheet and then copy the data from one file into the new sheet and add the header that I need for the file. Can this be
