What's New In Adobe Photoshop CC 2015 Version 16?

Q: how to speed up this code? I have this code that creates a program with a console and then reads from a text file to create an array. It took a while to run, but I am assuming that this is a very slow way to do it. i know that there are other ways to make the loop happen in a shorter amount of time. is there any way I can speed this up? public class PartsOfSpeech { public static void main(String[] args) throws FileNotFoundException { // TODO Auto-generated method stub System.out.println("hi"); Scanner input = new Scanner(new File("Samples.txt")); String[] Array = new String[23]; Array[0] = "Please enter an integer between 1 and 10 inclusive"; Array[1] = ""; Array[2] = "Enter a word:"; Array[3] = "Enter a word:"; Array[4] = "Enter a word:"; Array[5] = ""; Array[6] = "Enter a word:"; Array[7] = "Enter a word:"; Array[8] = "Enter a word:"; Array[9] = "Enter a word:"; Array[10] = "Enter a word:"; Array[11] = "Enter a word:"; Array[12] = "Enter a word:"; Array[13] = "Enter a word:"; Array[14] = "Enter a word:"; Array[15] = "Enter a word:"; Array[16] = "Enter a word:";
