Watch FIFA Interactive Partner Marketing Manager, John Kappos discuss FIFA 2016 "ultimate team" mode during IGN Pro League's new coverage of ELeague Season 1 Friday June 22 at 5pm EST on Twitch and IGN.com. FIFA 22 is a big step forward for the series. We are taking the great gameplay we've introduced in FIFA 15 with the new engine as well as taking it to the next level with more realism and immersion. There's a need and a desire for a game that really captures the feeling of what happens on the pitch. Starting with all gameplay modes, we have completely reworked the Player Impact Engine. This engine is used by all modes in the FIFA series. We've taken that and the new engine and redesigned the entire input system for more accurate player control and dynamics. The engine also handles all animations, all animations are animated, so there is no face-tweaking anymore. You never have to worry about how you look. It's always going to look like you're moving. We have also overhauled the ball physics and we are really proud of what we have done with them. This includes more accurate path-following, control of spinning, and having the ball follow the actual arc of its path. With the new ball control we are able to detect where the ball is going and help the player stay in-line with the path of the ball. In terms of the game modes, we have added new modes; Ultimate Team, Create-A-Team, and the weekly game modes. We have also added lots of new features like keeping your player the same regardless of how much match experience you have, match engine, offline game mode, starting lineups in training mode, and a brand-new player creator mode. We have also added an extremely detailed Ultimate Team mode. This mode is as deep as we've ever put in a traditional game mode. It really gives you the experience of being a professional player in an accurate way. Finally, we have added tons of new content. We have added in a Create-A-Team mode, scoring system, global star rating, and all kinds of content. It is a big game mode for us. Easier gameplay for the folks that are really new to soccer, such as our Create-A-Team mode, which allows you to pick a few random things, each having their own
