Note: Photoshop is available in several different versions, including: • Standard Photoshop, which provides 16-bit and 32-bit color editing for professional images, and 8-bit grayscale editing for home users • Photoshop Extended, which includes all the editing features of Photoshop plus the ability to print directly to a film. This version offers more memory and many new features. • Photoshop Elements, which provides lower-end features and printing capabilities and works well for beginners. Although Photoshop offers many features for image manipulation, it does not provide the advanced functionality found in some image-editing programs, such as Adobe's CorelDRAW and Adobe Fireworks. Photoshop users can edit images in almost any common format, and even edit the standard TIFF image format.

AP Photo/Satish C. Chowdhry In a tweet this evening, President Trump said that the U.S. is out of the Paris Agreement. "So," Trump said, "the Paris Agreement isn't working out so well for Paris. They were just complaining that the U.S. was ripping them out of the agreement. So we are out. We're out. We're out. And we'll see you at the one in Pittsburgh." Trump's tweet comes after reports that the President is weighing a withdrawal from the accord. According to the latest reports, the White House is currently looking into whether Trump can withdraw from the accord, something that would leave the U.S. as the only country in the world not signed on to it. But as we reported earlier today, there is a big difference between withdrawing from the accord and withdrawing from the U.N. on climate change. One way the U.N. can be, is that when you get the U.N. involved, it gives you everything from the moral high ground to legitimizing your climate-change message. Meanwhile, the U.S. is said to be in a standoff with French President Emmanuel Macron. The two leaders aren't talking and Trump has threatened to impose 25% tariffs on French products (Trump has long been against such taxes and is particularly opposed to this one). Perhaps in his tweet tonight, Trump is trying to signal a shift away from France and his longtime ally, a signal that Paris may have lost him.Join our Mailing List Send a note Please enter your message.
